Get Ready, Stay Ready, Yesterday’s Cyber Training Won’t Stop Tomorrow’s Threats

Cyberthreats are becoming more widespread, complex and targeted...

1,093
Data breaches reported in the U.S. in 2018

But just because any company can be targeted doesn’t mean your business isn’t at risk.

RELEVANCE TO CURRENT THREATS

NAMED THE MOST IMPORTANT CYBERRISK WHEN CONSIDERING A TRAINING SOLUTION

1,093
Data breaches reported in the U.S. in 2018

But just because any company can be targeted doesn’t mean your business isn’t at risk.

So how do you make sure your organization is prepared for anything and everything? The answer: you need ongoing cyber security training.

51%
Managers who call teams spend 1-5 days training per year.

52%
Organizations indicate traditional training makes them “moderately” or “slightly” or not at all prepared.

While most cyber security managers consider training a priority, their teams spend very little time on this important task. That’s because the training options that have typically been available fall short on many levels.

For instance, traditional cyber security training provides a one-time, one-size-fits-all training experience that may be outdated by the time the trainees have completed the program—and may be irrelevant to your business altogether.

CSX Training Platform

CONTINUOUSLY UPDATED, HIGHLY RELEVANT CYBER SECURITY TRAINING ON-DEMAND PLATFORM ENABLES ANYTIME, ANYWHERE LEARNING

SUBSCRIPTION COSTS LESS PER PERSON PER YEAR THAN A SINGLE TYPICAL TRAINING COURSE

The CSX Training platform provides anytime, anywhere access to continually updated, highly relevant content, including hundreds of immersive training videos, tasks, and tools.

This type of training is also cost prohibitive. At a price of up to $35,000 per person, a single course can consume your entire training budget for the year—and that doesn’t even account for the travel and inconvenience of travel and out-of-office time.

US$6K PER COURSE + TRAVEL COSTS AND OUT-OF-OFFICE TIME

US$6K PER COURSE + TRAVEL COSTS AND OUT-OF-OFFICE TIME

STAY FOCUSED WITH THE CYBERSECURITY NEXUS™ (CSX) TRAINING PLATFORM.

To help keep your security team at the top of their games at all times, ISAAC’s new CSX Training Platform provides anytime, anywhere access to continually updated, highly relevant content, including hundreds of immersive training videos, tasks, and tools.

Focused training courses dive deep into specific issues. New Lake—built from scratch based on the latest real-world threats that are most important to security clients—are released quarterly, so your team stays ahead of the curve. You can even direct training based on the unique needs of your organization and skill gaps in individual team members, as determined by the ISAAC Assessment Tool.

PLUS, THE CSX TRAINING PLATFORM IS DESIGNED TO HELP ORGANIZATIONS ENSURE THEY HAVE THE RIGHT PEOPLE WITH THE RIGHT SKILLS AT THE RIGHT TIME TO PROTECT AND DEFEND AGAINST RAPIDLY ADVANCING THREATS.

FOR MORE INFORMATION, CONTACT SALES@ISAAC.ORG OR VISIT WWW.ISAAC.ORG/CSXCYBERTRAININGPLATFORM.
